“Sloth Vill 2.0”

I chose to do a sloth theme as I did one last year on my portfolio and I wanted to make another even better one. I chose to name it “Sloth Vill 2.0” as it is similar to the one I did last year and it felt right to name it after it as the last one was “Sloth Vill”. It was important for me to sloths as they have been my favorite animal and it is one of the things I like. I used different shades of green so the grass and the trees would be different shades. I also used a scraper on the grass that was farther out for it to be lighter. Some people enjoyed that for the rocky parts I used black gray and white and blended them to get a nice shade and I used more black on the edges. On the river, I used blue then used a scraper. It was fun to make however it made a mess not only on the table but also my hand.
